

# Venipak

## Magento 2.x. module installation instructions

## 1. Module functionality

- Parcel delivery service to Venipak pickup points located in Estonia, Lithuania, Latvia, Poland;
- Parcel delivery by a courier in Estonia, Lithuania, Latvia, Poland;
- Parcel collection from Venipak pickup points in Estonia, Lithuania, Latvia, Poland;
- It is possible to print out either parcel labels and manifest from the e-shop's administrative environment;
- It is possible, from the administrative e-shop environment, to call a courier for parcel collection;
- COD (cash on delivery service).

## 2. Server requirements

The module is compatible with 5.6 and higher PHP versions. Before installing the module it is important to find out whether 5.6 or higher PHP version is installed in the server.

## 3. Installation procedure

If you have been using previous Venipak module, you can either delete it and install the new one. Or you can leave the old module, but make sure to disable it and then install the new one following the instructions below.

When the Venipak module is extracted it needs to be loaded into Magento root directory.

You need to connect to the server using SSH access. This can be done by going to the root folder and running such commands:

```
rm -rf pub/media/catalog/product/cache/*  
rm -rf var/cache/*  
php bin/magento setup:upgrade  
php -d memory_limit=2G bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy --language It_LT (language code depends on your current store language)  
php bin/magento setup:static-content:deploy --language en_US  
php bin/magento indexer:reindex  
php bin/magento cache:flush
```

To perform basic Venipak plugin settings go to **Stores -> Configuration**. On the left side of the menu find the block named **Sales** and then select the item named **Delivery methods**.

In an opened window select **Venipak** tab and enter information as follows:

Enabled for Checkout <small>[website]</small>	Yes
Title <small>[store view]</small>	Venipak
API ID <small>[website]</small>	17417

<input type="checkbox"/>	7	17417210915002	1,16,17			Sep 15, 2021, 12:03:07 PM	Yes	<a href="#">Print manifest</a>	<a href="#">Call courier</a>

When label is generated, new manifest is created in this page.

Here you can close and print manifest, call courier to pick up the package. If manifest is closed, no more orders can be added to it.

If you press Call courier, you will get the following window:

Call Venipak courier ×

Comment to courier (optional)

Weight

 Must be at least 2 hours difference between TIME FROM and TIME TO  
Minutes should be indicated quarterly: 15, 30, 45, 00

Courier arrival time (from)  Courier arrival time (to)

Warehouse

Select warehouse

[Send request](#)

[Close](#)

You can set arrival time (min gap between times is 2 hours) and warehouse, from which packages should be taken.

## 8. Venipak warehouses
