Venipak

Magento 2.x. COD module installation instructions

1. Module functionality

- Enables COD payments for Venipak Courrier service.

- Enables COD payments only for pickup points, which supports COD payments.

2. Server requirements

The module is compatible with 5.6 and higher PHP versions. Before installing the module it is important to find out whether 5.6 or higher PHP version is installed in the server.

3. Installation procedure

When the Venipak COD module is extracted it needs to be loaded into magento root directory.

You need to connect to the server using SSH access. This can be done by going to the root folder and running

such commands:

rm -rf pub/media/catalog/product/cache/*

rm -rf var/cache/*

php bin/magento setup:upgrade

php -d memory_limit=2G bin/magento setup:di:compile

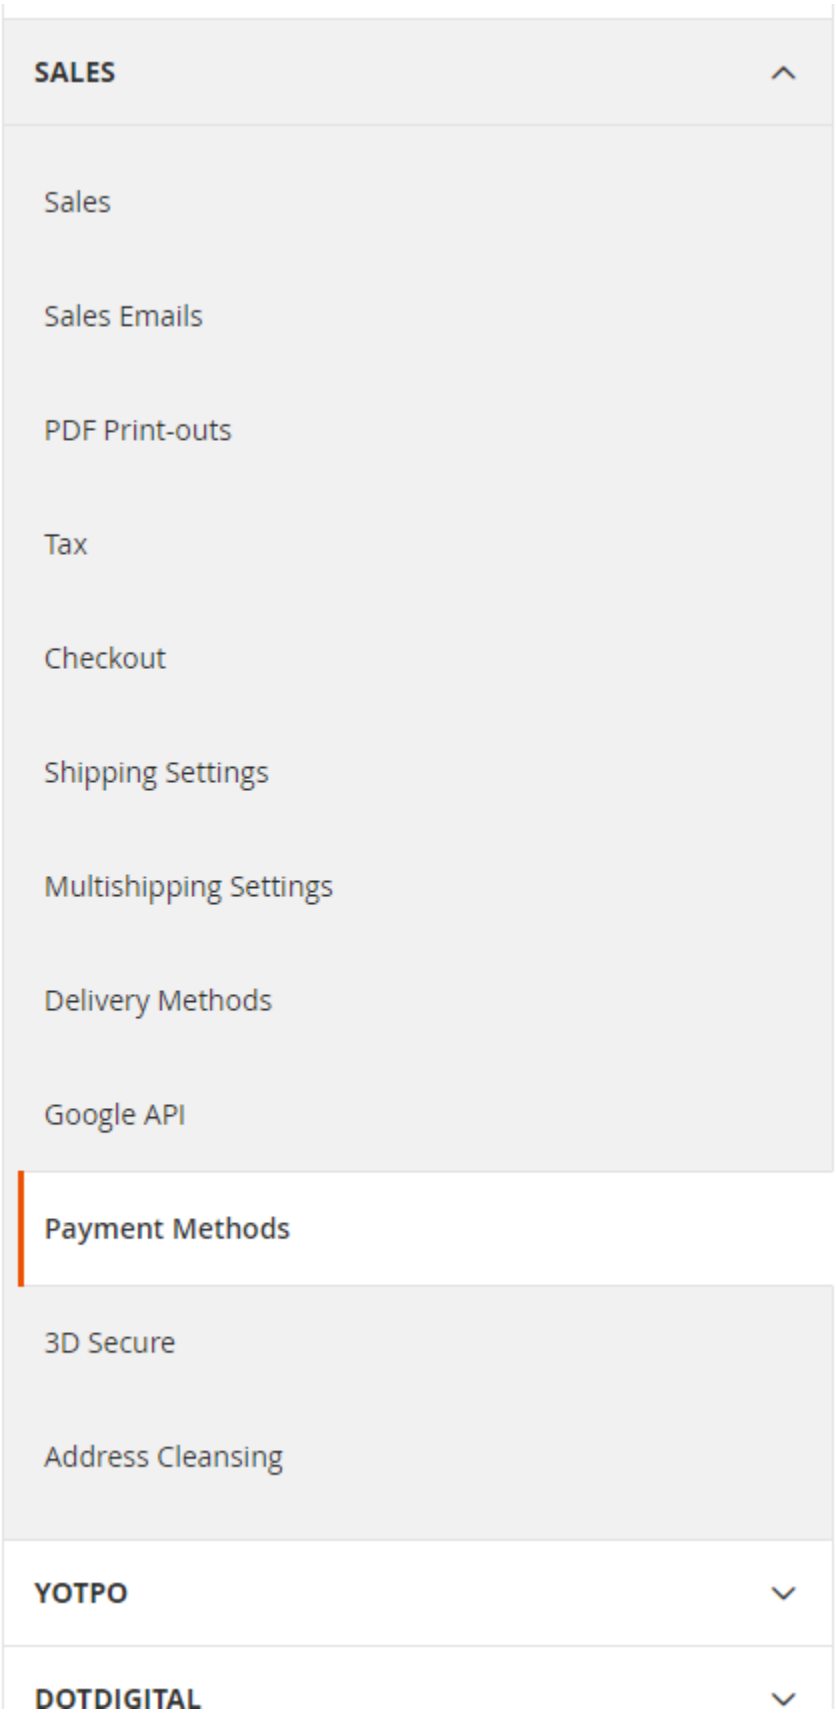
php bin/magento setup:static-content:deploy --language lt_LT ***(language code depends on your current store language)***

php bin/magento setup:static-content:deploy --language en_US

php bin/magento indexer:reindex

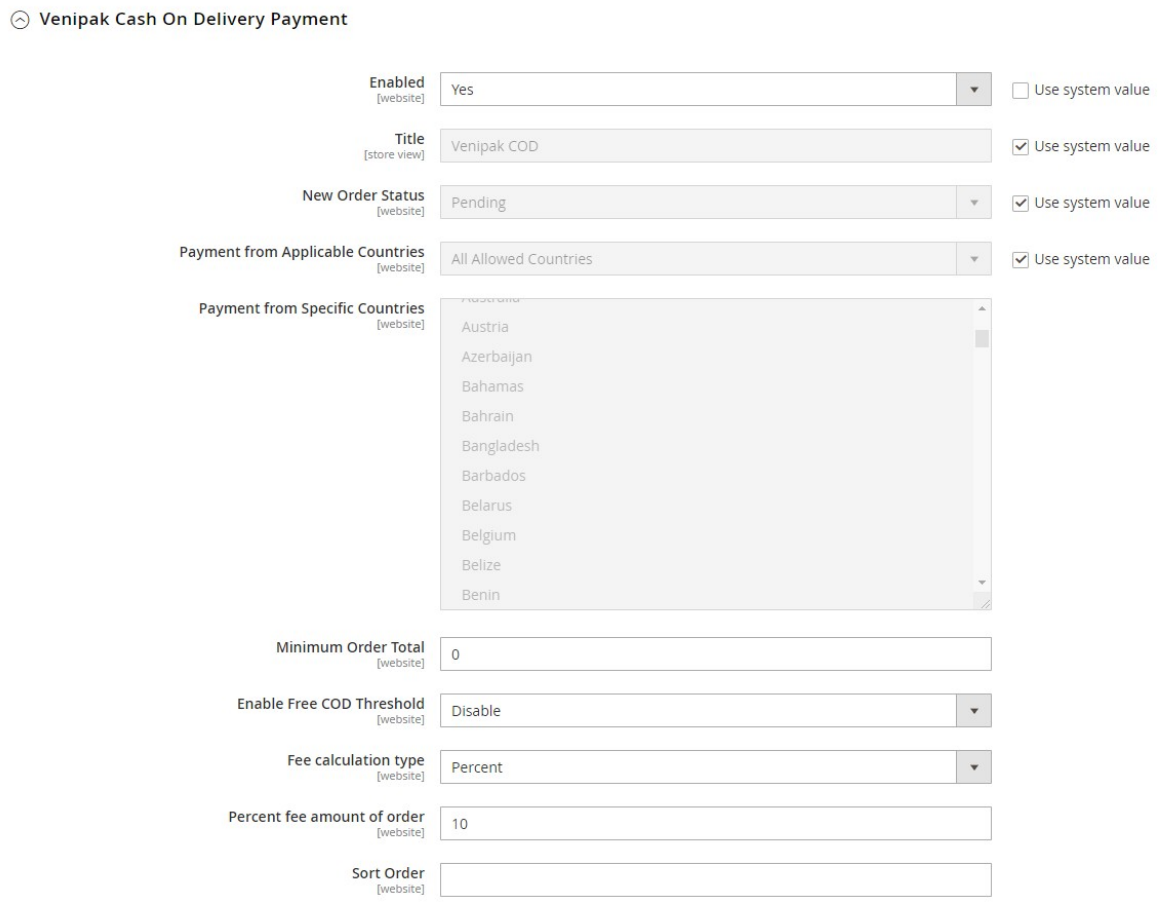
php bin/magento cache:flush

To perform basic Venipak plugin settings go to **Stores -> Configuration**. On the left side of the menu find the block named **Sales** and then select the item named **Payment methods**.



SALES
Sales
Sales Emails
PDF Print-outs
Tax
Checkout
Shipping Settings
Multishipping Settings
Delivery Methods
Google API
Payment Methods
3D Secure
Address Cleansing
YOTPO
DOTDIGITAL

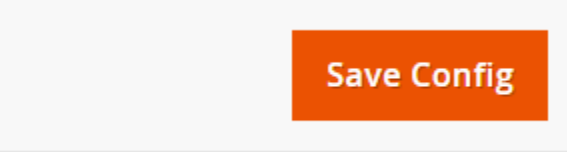
In an opened window select **Venipak Cash On Delivery Payment** tab and enter information as follows:



Enabled	This allows the payment method to be visible in the checkout
Title	The name of the payment service
API ID	API ID given by Venipak service
New Order Status	Status of new order placed with this payment method
Payment from Applicable Countries	Option to select all or certain countries from the list below
Payment from Specific Countries	Countries list, from which payment is available
Minimum Order Total	Minimum order amount, to be payment available
Enable Free COD Threshold	Allow free COD service, when order amount reaches set sum
Free COD Order Amount Threshold	Amount sum, from which COD service is free (must be enabled ‘Enable Free COD Threshold’)

Fee calculation type	Fee type, percent or fixed price
Percent fee amount of order	Fee in percent
Fixed COD fee amount	Fee in fixed price

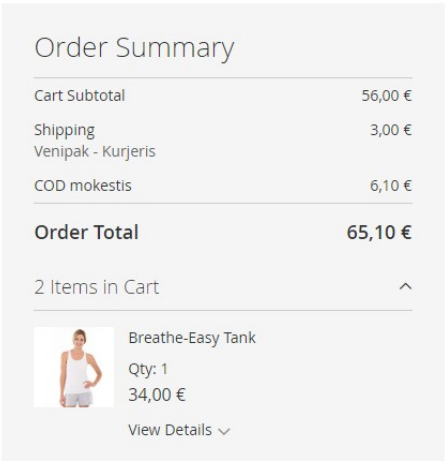
After configuration setup, you need to save them, by pressing “Save config”



4. Frontend view

When COD module is active, in checkout page you can see COD payment module.

In checkout total sum, you can also see COD fee amount, which was set in configuration window.



It is important to notice, that if Pickup Point delivery service is selected and it does not support COD, then Venipak COD payment method will not be visible.
