## Instructions for integrating Venipak with Mozello

Mozello users are able to connect their online stores with Venipak delivery service, which allows customers to specify the exact parcel terminal in Latvia to which they want to receive the shipment, and it allows the merchant to simplify the preparation and printing of delivery labels in the online store administrative environment.

\* Integration is only available to Mozello Premium Plus users.

## How to add Venipak delivery network to your Mozello online store

Before integrating Venipak Pickup into your online store, you must add the Venipuck Pickup delivery network to the catalog settings so that future customers can choose the delivery method and specify the exact parcel terminal in the order form.

 In order to add Venipak Pickup delivery network, please log in to your Mozello user account / page editing mode and select "Add new delivery method" option in the Catalog -> Catalog settings -> Delivery section.

mozello	

 In the list of delivery services, select Venipak Pickup and fill in all the important delivery conditions - delivery price and, if necessary, the minimum / maximum order amount, minimum / maximum weight, then save the changes.

## How to integrate Venipak delivery network into your Mozello online store

3. When the Venipak Pickup service delivery network is added to the Catalog settings, then choose **"Integrations"** option in the **Delivery** section.

**Important!** API user data will be provided when you have entered into an agreement with the delivery service to connect the API service.

## **Using Venipak Pickup integration**

In the online store administrative panel, open the Orders section and open a specific order.
 If the delivery method of the order is Venipak parcel terminal, a button "Deliver with
 Venipak Pickup" will be displayed. When you press this button, the system will

automatically generate a printable shipping label.
